

#### INSPECTOR GENERAL

DEPARTMENT OF DEFENSE 400 ARMY NAVY DRIVE ARLINGTON, VIRGINIA 22202–2884

MAY 24 1996

#### MEMORANDUM FOR SECRETARY OF DEFENSE

SUBJECT: Fiscal Year 1998-2003 Program Objective Memorandum, Office of the Inspector General, Department of Defense

Enclosed is our fiscal year 1998-2003 Program Objective Memorandum (POM) submission. It was prepared in accordance with the March 14, 1996 Preparation Instructions and the March 21, 1996 Fiscal Guidance. The POM submission reflects OIG programming within force management guidance consistent with the Department's downsizing goals. The force management guidance necessitated a reorganization of the OIG to ensure statutory mission accomplishment. We will continue to evaluate our ability to accomplish our mission within the targeted resource levels in future years.

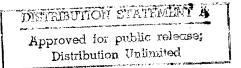

The POM contains recommended adjustments to authorized outyear Fiscal Guidance planning levels as follow:

#### TOA IN MILLIONS

	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003
Fiscal Guidance	137.2	133.7	130.1	128.7	131.6	134.4
Planning Request for						
Reengineered Systems	22.2	22.8	20.9	13.2	13.6	23.3

The Office of the Inspector General (OIG) is statutorily responsible to conduct audits and investigations for the Department of Defense. In FY 1995, OIG audits resulted in \$6.1 billion of savings achieved through questioned costs disallowed or funds put to better use. For the same year, the amount of OIG criminal investigative fines, penalties, restitutions and recoveries totaled \$631 million. For the first six months of FY 1996, realized audit savings totaled \$1.3 billion and criminal investigative fines, penalties, restitutions and recoveries were \$161.5 million. The performance of those functional areas is indeed impressive by any measure—from inception through FY 1995, OIG savings exceeded operating costs for the OIG by \$23 billion.

In FY 1996, we implemented an agency reorganization to ensure effective performance of our mission within resource guidance levels. Improved information systems support is imperative to enable the OIG and the Defense-wide audit and investigative communities to perform core functions while downsizing. As Principal Staff Assistant for audit, criminal investigations and inspections functions, I am presenting the Defense-wide requirements for implementation of the reengineered systems for the audit and criminal investigation communities. Funding received from the Corporate Information Management

Central Fund allowed the communities to conduct business process reengineering initiatives that are nearing completion. Draft target system requirements are undergoing review and validation. Implementation could begin as early as FY 1997 but will be stalled because of funding constraints. I am requesting that funds be reserved for implementation of the two systems. Validated economic analysis and final system implementation plans should be available for the September budget submission.

Your support is critical to ensure adequate audit and investigative coverage. I request that implementation proposal be favorably considered.

Inspector General

Vermin HU

The Office of Inspector General (OIG), Department of Defense, was established by P.L. 97-252, September 8, 1982, as amended. The Offices of Inspectors General were established to (1) audit and investigate programs and operations; (2) recommend policies and coordinate activities to promote economy, efficiency and effectiveness in programs and operations and prevent and detect fraud and abuse; and (3) keep the head of the establishment and Congress fully informed about problems and deficiencies and the necessity for and progress of corrective action. The OIG, DoD has fulfilled its mission successfully since its establishment due to the dedicated work of employees and the support provided by the Department and the Congress with sufficient resources to meet its charter.

The above guidance funding is requested for the following purposes:

(\$ In Millions)

	FY 98	<u>FY 99</u>	<u>FY 00</u>	<u>FY 01</u>	<u>FY 02</u>	<u>FY 03</u>
DoD-wide Reengineered Systems	22.2	22.8	20.9	13.2	13.6	23.3

The OIG must use programmed funds for maintaining and replacing existing software and hardware that comprise the basic infrastructure of a headquarters local area network and personal computers and notebooks with software for word processing, database and spread-sheet functions. The functional process improvement and development and implementation of DoD-wide reengineered systems cannot be funded within the FY 1998 Guidance levels. We were provided funds through the Corporate Information Management Central Fund for the consolidated functional process improvement project that began in FY 1994. Additional

funds are required by the OIG and Service audit and investigative agencies to implement the target systems. These estimates include contracting out the development, implementation and maintenance efforts for the target investigative system. There are differences in the communications estimates provided by components since the OIG funds for communication costs directly in its budget and Service audit and criminal investigative agencies may receive support through their respective Departments. The benefits from the reengineered systems are expected to include improved customer support, common/standardized data language and processes, common core performance measures, reductions in criminal investigative case administrative preparation time and improved criminal investigative case information repositories.

#### (\$ In Millions)

	<u>FY 98</u>	<u>FY 99</u>	<u>FY 00</u>	<u>FY 01</u>	<u>FY 02</u>	<u>FY 03</u>
Criminal Investigation System Audit Mgt Info System Reengineered Systems Total	19.6 2.6 22.2	20.8 <u>2.0</u> 22.8	$\frac{18.8}{2.1}$	$\frac{11.1}{2.1}$ $\frac{2.1}{13.2}$	11.6 2.0 13.6	$\frac{21.1}{2.2}$ $\frac{2.2}{23.3}$

#### **Summary**

In FY 1995, the OIG issued 314 audit reports that identified potential monetary benefits of \$6.8 billion. For the first six months in FY 1996, the potential monetary benefits totaled \$1.1 billion. In FY 1995, the investigation function obtained 372 indictments, 295 convictions and recovered \$631 million. For the first six months in FY 1996, fines, penalties, forfeitures, assessments, restitutions and recoupments totaled \$161 million.

The OIG has a well-established record of productive return on Government resources expended. Favorable consideration of the planning request level will enable the OIG to continue to provide the maximum support possible to meet statutory requirements to promote programmatic and operational economy, efficiency and effectiveness, and to detect and prevent fraud, waste and abuse. The planned implementation of the reengineered systems would result in improved coordination within the Department and improved operational effectiveness for the audit and criminal investigative communities.

#### Description:

Resource Baseline

The communications infrastructure costs represent the local telecommunications services at OIG headquarters and field activities. Field offices are operating with substandard equipment and services with limited data transmission capability. In FY 1998, the OIG plans to improvements in field activity communications capability. This change will result in increased communications costs but improve the operational efficiency and effectiveness of offices. The increased modernization costs in FY 2000 covers the potential change in telephone equipment in the National Capital Region.

Description:

The automated information technology costs involve hardware, software, maintenance, training, inter-agency service and information system support personnel for agency standalone and network requirements. In FY 1997, the OIG will convert to a graphical environment such as Windows and replace existing MS DOS-based application software. Information system plans include converting mainframe and personal-computer based administration systems into modules on the agency minicomputers accessible through the local area network. This conversion will increase operating efficiency. Future year budgets also support the maintenance of existing capabilities through planned replacement of equipment and software.

Description:

Resource Baseline

The OIG is responsible for standardizing all auditing, investigation and inspection data as part of the program to ensure that data elements are usable and transferable throughout the Department. The OIG data administration efforts include providing agency data administration guidance, reviewing proposed DoD standard elements, providing technical oversight in the development of the DoD-wide audit and criminal investigative computer data models and the standard data elements.
